Location

Summer Springs

The city area of Greater Summer Springs has a population of about 20000 most of whom work either in mining or farming. The city proper, if one can call it that, about 2000. There is a services sector of course, but the primary sectors are prevalent. A small river runs through the city and has some very minor shipping going over it. The main route of shipping is via train. There is a meagre forest in the south-east of the city, the rest of the surrounding area is irrigated farmland. There is local cattle and poultry processing in the only industrial sector of town.

Strip mining happens a few dozen kilometres up north of the city. Summer Springs is the hub for the logistics of that operation as well as providing the bandwidth for transporting the ore.

Financial Situation

The financial situation of the farm and other belongings, enterprises and private funds seems fine. She has running a small credit for a newer power source running at her local bank which had been paid of steadily. There *appear* to not be further accounts.
